EDUCATION

University of Massachusetts Lowell <i>Third-year Computer Science PhD student — GPA 4.0/4.0</i>	Lowell, MA, USA Jan 2024 – Now
Federal University of Mato Grosso (UFMT) <i>B.Sc. in Computer Science — GPA 3.62/4.0 (8.84/10.0)</i>	Cuiabá, MT, Brazil 2017 – 2021

RESEARCH EXPERIENCE

Graduate Research Assistant <i>University of Massachusetts Lowell — advised by Prof. Paul Downen</i>	2024 – Now Lowell, MA, USA
--	-------------------------------

- Study how codata and copatterns can bridge the functional and object-oriented paradigms, giving programmers a declarative way to define infinite and effectful objects.
- Developing **CoPy**, a Python language extension that brings copattern-based object-oriented programming to Python.
- Contributed to **CoScheme** [1], a Racket/Scheme macro library for compositional copatterns backed by a sound equational theory.

Undergraduate Research Assistant <i>Federal University of Mato Grosso</i>	2020 – 2021 Cuiabá, MT, Brazil
---	-----------------------------------

- Evaluated audio data-augmentation methods for bird-call classification.

Research Assistant <i>Federal University of Mato Grosso</i>	2020 – 2021 Cuiabá, MT, Brazil
---	-----------------------------------

- Co-created **RSDD** [2], a satellite-imagery dataset for modeling deforestation in the Brazilian state of Mato Grosso.

TEACHING EXPERIENCE

Undergraduate Teaching Assistant <i>Federal University of Mato Grosso</i>	2018 – 2021 Cuiabá, MT, Brazil
---	-----------------------------------

- Designed problem sets and led recitations and office hours across five courses: Discrete Mathematics, Data Structures, Theory of Computation, Algorithms, and Compilers.

INDUSTRY EXPERIENCE

Software Engineer <i>Acerto</i>	2021 – 2022 Remote · Belo Horizonte, MG, Brazil
---	--

- Built in-house tools that automated workflows for non-technical teams and optimized database queries at a debt-collection company.

Software Engineer Intern <i>NUTI-IC</i>	2018 – 2021 Cuiabá, MT, Brazil
---	-----------------------------------

- Developed a health-surveillance data system and public-health dashboards for the Mato Grosso State Health Department.
- Built a report-management system for POLITEC-MT, the state forensic-services department.

AWARDS & HONORS

ICPC South America / Brazil Finalist Outstanding Graduating Student (<i>Aluno Destaque</i>) <i>Federal University of Mato Grosso</i>	2021 2020/2
--	----------------

TECHNICAL SKILLS

Languages Rocq/Coq, Lean, Haskell, Rust, Python, C#, C, and JavaScript

Tools & Databases PostgreSQL, Microsoft SQL Server, .NET, Git, and QGIS

Natural Languages Portuguese (native) and English (fluent)
